---

---

Introducing the OSLS  
(Open Source Library System)

---

---

---

---

---

---

---

Two OSLS Products Currently  
Available

- Developed by Georgia Public Library Service for PINES
- Went live in 2007
- Designed for consortia

- Developed by Katipo Communications (New Zealand)
- Went live in 2000
- Designed for a single library

---

---

---

---

---

---

---

# Open Source: "Free" is Just the Tip of the Iceberg

## Koha

### Installed Base

- Over 1000 libraries internationally
- first US library came online in 2005 (Nelsonville Public)

### Primary market

- Smaller, international, school, special, and public libraries
- Kent County first big public library in U.S.

### Two user groups

- KUDOS (U.S.)
- Kohala (France)

### Developers

- distributed
- 80 contributors
- elected development team for each release

---

---

---

---

---

---

---

---

## Evergreen

### Installed base:

- 102 libraries (94 publics)
- 8 of those libraries are not part of consortia

### Primary market

- U.S. public libraries

### User groups

- none

### Development

- primarily Equinox Software, Inc.

---

---

---

---

---

---

---

---

## Size Matters?

- Small libraries may choose Evergreen
  - William Jessup University
  - Bear River Band Tribal Library
  - Moorpark City Library
- Large libraries and consortia may choose Koha
  - Howard County (MD)
  - South Central Library System (Wisconsin)

---

---

---

---

---

---

---

---

# Open Source: "Free" is Just the Tip of the Iceberg

Both are FOSS

---

---

---

---

---

---

---

---

## Open Source Software Licenses

### GNU GPL

- grants recipients rights to modify and redistribute the software
- derived works must be available under the same license

### BSD

- grants recipients rights to modify and redistribute the software
- derived works must acknowledge the original authors

---

---

---

---

---

---

---

---

Released under GNU GPL License

---

---

---

---

---

---

---

---

# Open Source: "Free" is Just the Tip of the Iceberg

Evergreen and Koha are free  
to download

...and always will be

---

---

---

---

---

---

---

*Copyleft* ensures freedoms are  
preserved

---

---

---

---

---

---

---

ILS vs OSLS

---

---

---

---

---

---

---

# Open Source: "Free" is Just the Tip of the Iceberg

Unicorn  
ALEPH  
Follett  
POLARIS  
auto-graphics, Inc  
SirsiDynix  
Symphony  
INNOVATIVE  
TLC CARL

ILS Licenses are ...not free

---

---

---

---

---

---

---

---

## Software Maintenance

OSLS: **No** software maintenance costs, software updates are free to download when you choose

OSLS	
2009	n/a
2010	n/a
2011	n/a
2012	n/a
2013	n/a

Proprietary ILS: Vendors charge annually to keep the software up-to-date

ILS	
2009	\$45,000
2010	\$47,500
2011	\$50,000
2012	\$53,000
2013	\$55,000

---

---

---

---

---

---

---

---

There are no Support "Options" with a proprietary ILS

...well, maybe you get to choose between a Gold, Silver and Platinum Support Plan but no choice about who will be your support provider

---

---

---

---

---

---

---

---

# Open Source: "Free" is Just the Tip of the Iceberg

## Support Options for OSLS

- Equinox Software <http://esilibrary.com> 
- Liblime <http://liblime.com> 
- ByWaters Solutions <http://bywatersolutions.com> 
- PTFS <http://ptfs.com> 

---

---

---

---

---

---

---

---

## Commercial service providers can provide

- ✓ OSLS support
- ✓ hosting
- ✓ migration assistance
- training
- service level guarantees
- security audits

---

---

---

---

---

---

---

---

## Support Costs

OSLS support contracts can be negotiated with suitable provider

Proprietary ILS vendors set annual cost of support and it usually goes UP not down

OSLS Support		
Year	Cost	Provider
2009	9,000	Liblime
2010	11,500	Liblime
2011	9,000	ByWater
2012	9,500	ByWater
2013	5,000	PLS

ILS Support		
Year	Cost	Provider
2009	15,000	Vendor
2010	17,500	Vendor
2011	20,000	Vendor
2012	23,000	Vendor
2013	25,000	Vendor

---

---

---

---

---

---

---

---

# Open Source: "Free" is Just the Tip of the Iceberg

## Consortia Providing Support

- PINES (Georgia)  
<http://www.georgialibraries.org/public/pines.php>

- SITKA (BC)  
<http://sitka.bclibraries.ca/>

- Michigan Library Consortium  
<http://mlcnet.org/evergreen/>

- Northeast Kansas Library System (NEKLS)  
<http://nexpresslibrary.org>

---

---

---

---

---

---

---

---

- 28 public libraries
- funded by State Library using LSTA grant
- services include:
  - purchasing and maintaining the central servers
  - personnel costs in operating the system
  - training
  - software development
  - data conversion

---

---

---

---

---

---

---

---

## DIY: Do it Yourself!

- Evergreen
  - William Jessup University (CA)
- “Independent” Koha Public Libraries
  - Viborg Public (SD)
  - Hopewell Public (NJ)
  - Castleton Free Library (and others in VT)
- Possibly more....

---

---

---

---

---

---

---

---

# Open Source: "Free" is Just the Tip of the Iceberg

---

---

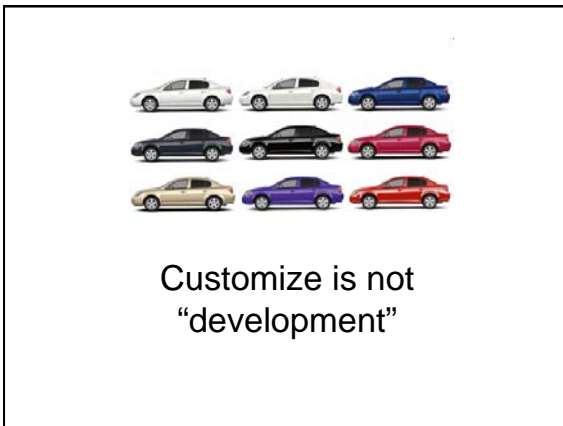

---

---

---

---

---

Customize is not  
"development"

---

---

---

---

---

---

---

Development means....

- Never having to say you're sorry?
- You define requirements
- You select developer
- You define process
- You negotiate a price
- You pay when you have your "deliverable"

---

---

---

---

---

---

---

# Open Source: "Free" is Just the Tip of the Iceberg

Sweet! My book is ready!

Many development options with an OSLS

---

---

---

---

---

---

---

---

Hire one.

---

---

---

---

---

---

---

---

Currently...

- Evergreen
  - Develop requirements for everything we could ever imagine
  - Contract with provider to 'start making it so....'
  - Examples: KCLS (Equinox), Middletown Township (PTFS)
- Koha
  - Get Scope Analysis (what we need vs. what is currently available in OSLS)
  - Get quote to fill the gap
  - Example: South Central Library System (Liblime)

---

---

---

---

---

---

---

---

# Open Source: "Free" is Just the Tip of the Iceberg

## Next Generation Development Scenarios

### Share-a-Developer

- Consortia hires a programmer
- Consortia prioritizes and manages development projects

### Co-sponsor development

- "We want this"
- "You, too?"
- "Let's share the cost"

---

---

---

---

---

---

---

---

## Development vs. Cost Savings

Use money saved in licensing fees to fund big development effort

Build in-house expertise for development initiatives

Coordinate development efforts with other libraries while reducing annual costs

Reduce annual costs dramatically by taking OSLs as it is

---

---

---

---

---

---

---

---

Notes from the field....

---

---

---

---

---

---

---

---

# Open Source: "Free" is Just the Tip of the Iceberg

## Georgia PINES

1. Shared ILS wasn't performing as needed
2. PINES staff believed they could do better
3. Demo'd proof of concept (POC)
4. State Library provided additional funds to take the POC further
5. It worked.
6. Evergreen

*Example*

---

---

---

---

---

---

---

## William Jessup University

1. Something had to change
2. Looked over options
3. Looked for OS options first...
4. Library Director, IT Staff and other stakeholders agree to take the plunge
5. Went solo (no support) and have been up since 2008.

*Example*

---

---

---

---

---

---

---

## Salinas Public Library

- Library short on money and staff
- Koha + Liblime provided the alternative they needed
- Some limitations: No acquisitions – no telecirc – no floating collections
- Biggest challenge: staff acceptance
- Customers love it

*Example*

---

---

---

---

---

---

---

# Open Source: "Free" is Just the Tip of the Iceberg

## Evergreen Indiana

- State Library coordinates effort and pursues LSTA funding
- Equinox helps with migration strategy
- Hussey-Mayfield Public Library agrees to go first
- Soon have a group of 20 pilot libraries that form Executive Committee to develop policies and procedures
- Currently 26 libraries live on Evergreen Indiana (3.5 million circs) – more want in

*Example*

---

---

---

---

---

---

---

## Santa Cruz Public

- Strong commitment to OS in other areas
- Evaluate options and choose Koha
- Contract with Liblime even though some key ingredients missing
- No funding available for development of "missing ingredients"
- Standing by.....

*Example*

---

---

---

---

---

---

---

## Summary of Benefits

### Cheaper

- No license and software maintenance
- No SIP licenses to buy
- Cost savings can be rolled into development and/or staff development

### Other Benefits

- Can "try" before you "buy"
- Can choose your own provider for support, hosting, migration, development
- Can customize your installation
- Can develop new features and modules
- Easier to integrate with 3P products

---

---

---

---

---

---

---

# Open Source: "Free" is Just the Tip of the Iceberg

I'm interested in an OSLS!

What do I do next?

---

---

---

---

---

---

---

When you use traditional procurement methods, you get traditional products

---

---

---

---

---

---

---

Take the Plunge!

---

---

---

---

---

---

---

## Open Source: "Free" is Just the Tip of the Iceberg

### Next OSLS Webinar

July 21, 2009

*"Libraries Are Doing it For Themselves"*

- Hear about California's "Open Source, Open Libraries Consortium"
- Learn how to get involved in an OSLS project near you....
